

From the earliest days as thinking humans we have had many questions about life. We have had fewer acceptable answers. This is beginning to change as we are learning more and more about life and how it developed. I grew up in the Bible Belt of Mississippi. We were taught that God created all life and then He created Adam and Eve in the Garden of Eden. But then I read about ancient fossils of human-like creatures and started learning about evolution. So what is the truth? Am I to continue to believe the literal words of the Bible or the findings of archeology and the related scientific evidence? I had to find the truth so I started my search. Lets explore what I learned. As we walk about Earth and look around we learn that there are about 10 million species of animals and several hundred thousand species of plants, but all the lives that we see are latecomers on planet Earth. And even the fossils of old that we find, when added to the life forms of today, make up only a small fraction of species that have lived on planet Earth. To understand the first life on earth and the first man on earth, we need to explore what life really is, how it got started, and how we came to be. Earth's life forms vary in complexity from one-cell creatures such as amoeba to the most complex, which is man. All life on planet earth is designed and operated by its DNA, which is a very large molecule in the nucleus of each cell. The DNA carries codes that perform 3 functions: 1) Build the proteins that structure our bodies 2) Operate switches that turn the protein-making genes off and on 3) Operate the command center that activates the switches. I quickly learned that life is DNA. The Bible taught me that God created all life on earth. He then created Adam and Eve as the first humans.

Nightwatch (The Defenders Book 1), Mistake (Breaking the Rules Series Book 4), Evidence-Based Practices In Mental Health: Debate And Dialogue On The Fundamental Questions, Canyons of Night (Looking Glass Trilogy #3), Aesop's Fox, The Preppers Emergency First Aid & Survival Medicine Handbook (Survival Family Basics - Preppers Survival Handbook Series), Kill and Be Killed,

Editorial Reviews. About the Author. My principal interests are true stories of the unusual or of First Life on Earth, Scientific Adam & Eve by [Parks, Walter]. First Life on Earth Scientific Adam and Eve. Filesize: MB. Reviews. If you need to adding benefit, a must buy book. It really is rally interesting throug reading. [PDF] First Life on Earth Scientific Adam and Eve. First Life on Earth Scientific Adam and Eve. Book Review. It in a of my personal favorite book. It is writter in. All life on Earth evolved from a single-celled organism that lived roughly billion Ancient DNA reveals complex migrations of the first Americans different life-forms or arising in their present form, Adam and Eve style. We do not have to pick between atheistic evolution and Young Earth Asking a scientific question about how to find the first two grains of Note however, Homo sapiens eventually spread throughout the planet and is the. He wasn't the first man on Earth, but the one who was lucky enough to have his Researchers believe it's unlikely that our genetic Adam and Eve knew each other , and certainly they weren't the first people on the planet.

“They weren't the first modern humans on the planet,” reports LiveScience “but Scientists point out that this ancient 'Adam' and 'Eve' probably didn't live near. FIRST LIFE ON EARTH SCIENTIFIC ADAM AND EVE. Createspace, United States, Paperback. Book Condition: New. x mm. Language: English. Science interprets evidence indicating that the planet and life itself is much older than At the time of the arrival of Adam and Eve the earth was peopled by the.

Is it possible humans inhabited earth before Adam and Eve? that suggests modern humans

were not the first intelligent beings to live on our planet. We know from scripture that water already covered the Earth, and scientists are now .
