

HIBISCUS - A Passion Forever.- Describes the passion for those magic plants that lead the author to discover some of the secrets they hide, and that will allow you to get your own bigger blooms, enhanced colors, more healthy plants that will bloom all year round and increase the average number of hibiscus seeds per pod. Through the years, I have developed my theory that hibiscus make you feel younger. Not only have they brought energy and life to an 88 year young friend of mine, but they have also been chosen by young people to show they are surfers. Hibiscus is a flower that proclaimed on its won: "I stand for life, for fun, for youth, for enthusiasm, and so on". Even lovely young girls adorn their hair with them in summer. Every seed is a new dream, a new project, all by itself. It can grow into something glorious, or it can show very faint colors, it can be huge or very small, it can have one row or petals, or bear petaloids or frills, but it will never cease to astonish. The book is written in a way that will encourage you to grow your own hibiscus from seeds and achieve the joy and fulfillment of producing your own unique plants, and be the first one in the world to see that first unique bloom. The book is full of wonderful and colorful hibiscus pictures that will introduce you to Hibiscus Magic. Growing Hibiscus is a passion for creation, and it makes you feel you are doing magic. I can hear the "Wwoowws" from many hibiscus friends worldwide whenever one of us has bred a stunning seedling with unique pattern and color combination.
