

Lloyds Introduction to Jurisprudence is the leading textbook on jurisprudence in the English-speaking world. It enables the reader to develop a good understanding of the theories of the different schools of jurisprudence and to appreciate the contributions made to legal theory by leading jurists from the Ancient Greeks to the postmodernists. As ever, it combines text and extracts from authoritative sources. The works of more than a hundred jurists are extracted from Aristotle to the LatCrits. These are supported by detailed and well-documented introductory sections - a textbook in themselves - which give critical insight into the texts. Students and their teachers will profit from having in one book a wide-ranging compendium of legal thought. This new edition contains major new chapters on Theories of Justice and Critical Race Theory. There is substantial new writing in nearly every chapter, with greater emphasis on Hart (particularly the Postscript and the commentary this has provoked), on Raz, Habermas and Unger. Amongst jurists extracted for the first time in this edition are Coleman, Perry, Kramer, Nelken, Iris Marion Young and Tamanaha. There are new sections on the obligation to obey law, the legal enforcement of morality, and precedent. Legal process, legal pluralism, the private-public dualism, and corrective justice are just a few of the subjects now included for the first time. Whatever the syllabus, Lloyds Introduction to Jurisprudence offers both text and library, enabling students and teachers to find, comprehend and evaluate the core materials, classical and contemporary, in one of the most difficult and rewarding of disciplines.

20 Gluten-Free Breakfast Recipes and Gluten Free Snacks for a Gluten Free Diet: Includes Gluten Free Muffins and Gluten Free Cookies, John Deere: Dig! Lift! Push!
