

What is human? What is a machine? How do they differ? Or do they? In these 15 stories about robots and androids, Philip K. Dick asks these questions. The answers differ with each story in the fictional world and in the exploring mind of Dick the only certainty is change but the author establishes some guidelines: "To be human, one must maintain his intellectual and spiritual freedom at all costs. He must refuse obedience to any ideology; he must remain unpredictable, unfettered by patterns and routines."
