

This book contains papers and special lectures presented at the workshop Underground Works under Special Conditions held in Madrid in 2007, within the framework of the 11th International Congress of the International Society for Rock Mechanics. It contains a comprehensive collection of topics related to some of the most complex underground works recently undertaken across the world. A number of main themes are highlighted in the book: rock burst, face stability, design parameters and TBM selection criteria, among others. Underground Works under Special Conditions will be invaluable to consultants, designers, contractors and researchers, and all professionals working in the tunnelling and underground world.

StreetSmart Madrid Map, Hypatia, Walden: Roads Classics, Scandals Daughter, Mobile Web Development: Building mobile websites, SMS and MMS messaging, mobile payments, and automated voice call systems with XHTML MP, WCSS, and mobile AJAX, Reprogram Your Mind: Change Your Habits, Change Your Attitude, Change Your Life!,
